\* The tutoring schedule is indicative and subject to possible changes. Please check tutoring times with the faculty member in charge.

### 3. Prior knowledge recommended to take the subject

---

#### 3.1. Recommended (passed) subjects

The subject - recommended (passed), are not defined.

#### 3.2. Other recommended learning outcomes

- Students should send a copy of their B2 certificate to their tutor 5 working days before the written exam.
- From all language certificates acknowledging B2 level, we strongly recommend against APTIS.
- B2 certification is required (SAI), according to the terms established by the Universidad Politécnica de Madrid

## 4. Skills and learning outcomes \*

---

### 4.1. Skills to be learned

CG-24/25/26/27 - Capacidad para trabajar en el contexto internacional, comunicándose en lengua inglesa y adaptándose a un nuevo entorno.

CG-6 - Capacidad de abstracción, análisis y síntesis

CG-7:10/16/17 - Capacidad para trabajar dentro de un equipo, organizando, planificando, tomando decisiones, negociando y resolviendo conflictos, relacionándose, y criticando y haciendo autocrítica

### 4.2. Learning outcomes

RA224 - Recopilar y sintetizar coherentemente información de fuentes bibliográficas.

RA222 - Comunicarse de forma eficaz tanto formal como informalmente bien en grupo o de forma individual, mediante el uso de las TIC.

RA225 - Redactar distintos tipos de textos según las convenciones propias de cada tipo textual.

RA223 - Exponer temas profesionales de modo claro, preciso y coherente, teniendo en cuenta el tipo de audiencia.

\* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

## 5. Brief description of the subject and syllabus

---

### 5.1. Brief description of the subject

The main objective of this course is to make students aware of the importance of effective communication skills in academic or professional settings, with a strong focus on contemporary issues related to computer engineering, and to help them develop those skills to communicate effectively in both settings.

The course will be organized around science and technology-related topics, and 2 assignments (written Research Proposal -RP- and Oral Presentation -OP) that they must complete to pass the course.

It is expected that students can:

1. identify and describe major economic, environmental, and health problems, etc. for which a computer engineering solution could have a major impact on society;
2. identify different types of texts in their area of knowledge, as well as the register and tone typically used in scientific and technical texts;
3. read and summarise relevant materials about contemporary issues for which computer engineering may play a role, be it orally or in writing;
4. write coherent and cohesive texts that have a clear focus on contemporary issues, structuring, paragraphing, punctuation, etc., and that are correct from a grammatical and spelling viewpoint;
5. use correct references and citations from relevant materials about contemporary issues for which computer engineering may play a role;
6. deliver a written document about an original and innovative research idea (RP) that addresses contemporary issues relevant to computer engineering;
7. develop listening comprehension skills in their area of knowledge;
8. use and explain figures and diagrams in a proper manner (OP);
9. deliver a technical and scientific presentation about an original and innovative research idea that addresses

contemporary issues relevant to computer engineering (OP) following the instructions explained in class and shared on Moodle;

As for the teaching methodology, we will follow a student-centered approach to learning in which the lecturer's role is to motivate students and facilitate their learning and overall comprehension of concepts and tasks. Student learning is assessed through both formal and informal forms of evaluation, including group projects, student and class participation. Teaching and assessment are connected, and student learning is continuously measured during teacher instruction.

Regarding teaching strategies, direct instruction will be combined with challenge-based learning and event cooperative learning at some stages. Challenge-based learning will be the predominant teaching method. This method focuses on student investigation and hands-on learning. Students will "learn by doing" as much as possible, both in the case of writing assignments as well as when delivering oral presentations. Students will also learn from constructive feedback on their work and on the work of others, and will also get feedback from their peers.

## 5.2. Syllabus

1. What is Professional and Academic Communication? - Introduction to the course
  - 1.1. 21st Century Skills in the context of EPAC
  - 1.2. Description of assignments: Research Proposals and Oral Presentations (Assignments may vary to grantee students' engagement )
2. Formulating a research idea
  - 2.1. Research proposal structure: understanding the parts of a research document
  - 2.2. Investigating current practices
  - 2.3. Covering research gaps
3. Academic writing: plagiarism, paraphrasing, summarising, referencing and quoting
4. Presenting a research idea
5. Student's Oral Presentations
6. Student's Research Proposals

### 7.1.3. Referred (re-sit) examination

No se ha definido la evaluación extraordinaria.

## 7.2. Assessment criteria

Students will be assessed according to the **progressive assessment option tasks** specified below:

1. Written assignments (Research Proposal) in groups of 2 to 3 students (20%)
2. Oral Presentation in groups of 2 to 3 students (20%) - **same topic as the one chosen for the research proposal**. Overall duration: 3 minutes for each group member.
3. Attendance and active participation in class (10%) - **PORCENTAJE NO RECUPERABLE EN LA EVALUACIÓN GLOBAL**
4. Written exam (50%) - individual task

Should students fail any of the tasks described above, they will have the option to retake the above-mentioned tasks (with the exception of the ones marked as NO RECUPERABLE) as part of the **global assessment option**, as follows:

1. Written assignments (Research Proposal) in groups of 2 to 3 students (20%)
2. Oral Presentation in groups of 2 to 3 students (20%) - **same topic as the one chosen for the research proposal. Duration: 3 minutes for each group member. Format: video recording.**
3. Written exam (50%) - individual task. The duration of the exam may vary and will be announced in the exam room by the proctors.

**IMPORTANT NOTE:** The final score will be the result of averaging out the sum of the marks obtained in the compulsory assignments specified above, only if they are above the minimum score specified in the assessment table (5 is the minimum grade to pass each assignment).

If a student fails only the exam and passes the assignments (research proposal and oral presentation), he or she

will only have to take the exam in the extraordinary call. The grades of the assignments will be kept only during the academic course.

If a student fails one or both of the two assignments but passes the exam, both assignments will need to be re-submitted (but the exam will not need to be retaken). The grades of the exam will be kept only during the academic course

The activities may vary to guarantee students' engagement. Check Moodle for more details.

The extension of the proposal will be announced in class at the introduction of the course. A standard font should be used, preferably 12-point Times New Roman or Arial, with 1,5 line spacing.

This information is general and may vary from one semester to another. See Moodle for details that apply to the semester you are enrolled in.

A **Power Point presentation** will be required to support the oral presentation and will need to be submitted alongside the research proposal (a specific task in Moodle will be created to this effect and timely notified to students).

Scoring rubrics for oral presentations collecting these and other important assessment criteria to be taken into account in the evaluation process will be made available on Moodle.

Please note that reading directly from notes, scripts, or slides during the oral presentation will result in a failing grade. We expect all students to engage with their audience and demonstrate a comprehensive understanding of their material.

Due to the nature of the exam questions we conserve the right not to share the exams. Students will be provided with an exam sample to be used as a mock exam for practice.

The grade of the group assignments includes a percentage (see the rubric on Moodle) of group organization and problem-solving skills. Tutors can provide advice, but will not solve any internal group problems.

Group assignments are to be submitted by the group leader and no individual submission will be allowed.

**Note that students holding a B1 certificate must present a B2 certificate in "Secretaría" and send a copy to their tutor no later than 5 working days before the exam.**

## 8. Teaching resources

## 9. Other information

---

### 9.1. Other information about the subject

Communication with your tutors will be held by email and/or virtual meetings by appointment, preferably within the time slot of the official office hours (Tuesdays or Thursdays).

The platforms to be used for online sessions, office hours, or any other type of meetings will be Teams and Zoom.

This course strongly contributes to 2030 Agenda for Sustainable Development Goals (SDG) in the following ways:

- Goal number 4. **Quality education**, in the sense of encouraging students lifelong learning using foreign languages;
- Goal number 5. **Gender equality**, by promoting class debates around prominent female researchers, scientists and engineers;
- Goal number 9. **Industry, innovation and infrastructure**, by encouraging students to research on technological advances that may have an impact on society .

- Goal number 6. Clean water and sanitation; Goal number 7. Affordable and clean energy; Goal number 8. Decent work and economic growth; Goal number 11. Sustainable cities and communities; Goal number 12. Responsible consumption and production; Goal number 13. Climate action; by encouraging students to read texts, watch videos and discuss on topics related to the mentioned goals and to think on how Computer engineering may contribute to these objectives.
